

AUTOTRAQ

Smart Auto Parts Inventory Management

Transforming how auto repair shops and fleet managers track, order, and manage parts — in real time.

CS490 • University of Northern Colorado

Parts Management Is Broken

Time Wasted

Staff spend hours manually searching for parts across suppliers and spreadsheets

Lost Revenue

Stockouts and overstock cost shops 10–20% of annual revenue

No Visibility

No real-time view of inventory levels, leading to duplicate orders

Manual Errors

Paper-based and spreadsheet systems cause costly ordering mistakes

Introducing AUTOTRAQ

**One platform.
All your parts.
Always in control.**

AUTOTRAQ is a cloud-based inventory platform that gives auto shops and fleet operators real-time visibility, smart reordering, and complete parts traceability.

01

Real-Time Inventory

Live stock counts across all locations and vehicles

02

Smart Reordering

Auto-alerts and one-click ordering when stock runs low

03

Parts Traceability

Full audit trail from supplier to job completion

KEY FEATURES

Everything You Need, Nothing You Don't

I

Inventory Tracking

Live stock levels
across all locations

O

Auto Reorder

Set thresholds, let
AUTOTRAQ order for
you

S

Supplier Integration

Connect directly to
your suppliers

R

Reports & Analytics

Costs, usage trends,
and waste metrics

M

Mobile Access

Manage inventory
from your phone or
tablet

From Setup to Savings in 4 Simple Steps

1

2

3

4

Connect

Link your parts suppliers and existing inventory systems in minutes

Catalog

Import or scan your parts to build a complete digital inventory

Track

Monitor stock levels in real time as parts are used on jobs

Optimize

Use analytics to cut waste, avoid stockouts, and save money

Built for Two Powerhouse Industries

Auto Repair Shops

- 160,000+ independent shops in the U.S.
- Average shop carries 2,000–5,000 SKUs
- Parts account for 40–60% of revenue
- Most still rely on paper or basic spreadsheets

Fleet Management Companies

- 500,000+ commercial fleets across the U.S.
- Unplanned downtime costs \$700/hr per vehicle
- Parts procurement is the #1 pain point
- Growing demand for predictive maintenance

TAM for AUTOTRAQ

Shops + fleet software

WHY NOW?

- ✓ Post-COVID supply chain disruptions made real-time inventory critical for every shop
- ✓ Rising vehicle complexity means more SKUs and higher cost of errors
- ✓ Cloud adoption in SMBs hit a tipping point — shops are finally ready for modern software

Auto Repair Shops

THE SCENARIO

Mike's Auto Care runs 3 bays with 2 techs. Every week he loses hours searching for parts across 4 supplier catalogs, calls in duplicate orders, and occasionally turns away customers because he didn't know a part was out of stock.

With AUTOTRAQ:

- Stock levels update the moment a part is used on a job
- Low-stock alerts trigger automatic reorder requests
- Mike gets a daily report on parts spend and waste
- Zero stockouts. Zero duplicate orders.

 **8 hrs/week**

Saved on parts lookup

Customer satisfaction score

Fleet Management Companies

THE SCENARIO

Rocky Mountain Logistics runs 85 delivery vehicles. When a truck breaks down, every hour of downtime costs \$700. Their parts warehouse is managed by one person with a clipboard.

With AUTOTRAQ:

- Each vehicle gets its own maintenance and parts profile
- Predictive alerts flag parts nearing end-of-life before failure
- Central dashboard shows stock across all depots
- Integration with fleet GPS ties mileage to part wear schedules

62%
