

AutoTraQ Testing Checklist — BEN (Frontend)

Login: ben@autotraq.app / autotraq2026 **URL:** https://cs490unco.org **Role:** Manager

Your section is the **frontend UI**. Go through every page and interaction below. For each task, mark  if it works or  if something is broken, and write a short note about what you see.

1. Authentication & Login (10 tasks)

- ☐ Go to https://cs490unco.org — verify the Welcome/Landing page loads
- ☐ Click "Login" or navigate to /login — verify login form appears
- ☐ Try logging in with **wrong password** — verify error message shows (not a crash)
- ☐ Try logging in with **empty fields** — verify validation prevents submission
- ☐ Log in with your real credentials — verify you're redirected to /dashboard
- ☐ Check the **top navigation bar** — verify your name shows and all nav links are visible
- ☐ Click your **profile/name** area — check if logout option exists
- ☐ Click **Logout** — verify you're returned to login page
- ☐ Try navigating directly to /dashboard while logged out — verify you're redirected to /login
- ☐ Log back in for the rest of the tests

2. Dashboard Page (12 tasks)

- ☐ Verify the Dashboard loads without errors
- ☐ Check **total parts count** displays (should be 534)
- ☐ Check **total inventory units** displays (should be ~5,491)
- ☐ Check **low stock alerts** section — note how many items show
- ☐ Check if there are any **charts or graphs** on the dashboard — describe what you see
- ☐ Verify the **layout is responsive** — resize your browser window to half width, does it still look good?
- ☐ Check that **all stat cards** have actual numbers (not "NaN" or "undefined")
- ☐ Click on any **dashboard link** that navigates to another page — does it work?
- ☐ Check **loading states** — when the page first loads, is there a spinner or skeleton?
- ☐ Open browser **DevTools (F12)** → Console tab — are there any red errors?
- ☐ Check the page **title** in the browser tab — what does it say?
- ☐ Take a **screenshot** of the full dashboard and save it

3. Parts Catalog (15 tasks)

- ☐ Navigate to /parts — verify the parts list loads
- ☐ Count approximately how many parts show on the first page
- ☐ Check if **pagination** exists — can you go to page 2, 3, etc.?
- ☐ Try the **search bar** — search for "engine" — do results filter?
- ☐ Try searching for "xyznotapart" — verify it shows "no results" gracefully
- ☐ Clear the search — verify all parts return
- ☐ Check if there are **filter options** (by condition, make, model, etc.) — test each one
- ☐ Click on any **individual part** — verify the Part Detail page loads (/parts/:id)
- ☐ On the Part Detail page, verify: name, SKU, description, condition, price are all visible
- ☐ Check if the part has **images** — do they load?
- ☐ Hit the **browser back button** — does it return to the parts list at the same position?
- ☐ Try **sorting** the parts list (by name, price, etc.) — does it work?
- ☐ Check if there's a **"Create Part"** button (you should see one as Manager)
- ☐ Click "Create Part" — does the form open? (Don't submit, just verify the form exists)
- ☐ Check the **parts list on mobile** (resize to phone width) — is it readable?

4. Vehicles Page (8 tasks)

- ☐ Navigate to /vehicles — verify the vehicle list loads
- ☐ Check how many vehicles are listed
- ☐ Try **searching/filtering** vehicles by make (e.g., "Toyota", "Ford")
- ☐ Click on an individual vehicle — does a detail view show?
- ☐ Check that vehicle info displays: Year, Make, Model
- ☐ Verify there's a way to **create a new vehicle** (button should exist for Manager role)
- ☐ Click create — verify the form loads (don't submit)
- ☐ Check for any **broken links or missing images** on this page

5. Inventory Page (10 tasks)

- ☐ Navigate to /inventory — verify the page loads
- ☐ Check if **inventory locations** are listed
- ☐ Look for **stock levels** — are quantities shown for parts?
- ☐ Check for a **"Receive Stock"** button — click it, verify the form appears
- ☐ Check for **"Stock Correction"** option — is it available for your role?
- ☐ Look for **Top Movers** section — does it show which parts move most?
- ☐ Look for **Dead Stock** section — does it identify items that haven't moved?

- ☐ Check **inventory history/events** — is there a log of stock changes?
- ☐ Try filtering inventory by location (if the option exists)
- ☐ Check if stock quantities match what the Dashboard shows

6. Requests Page (8 tasks)

- ☐ Navigate to /requests — verify the page loads
- ☐ Check if there are any existing requests listed
- ☐ Look for a "**Create Request**" button — click it
- ☐ Fill out a test request (any part, quantity 1) — **submit it**
- ☐ Verify the new request appears in the list
- ☐ Check request status — does it show "Pending" or similar?
- ☐ Try **approving** a request (you should be able to as Manager)
- ☐ Check if the request status updates after approval

7. Search & Advanced Search (8 tasks)

- ☐ Navigate to /search — verify the search page loads
- ☐ Try a **basic text search** for any part name
- ☐ Navigate to /parts/search (Advanced Search) — verify it loads
- ☐ Check if there's a **hierarchy tree** (System → Component) in the sidebar
- ☐ Click on a system in the hierarchy — do parts filter?
- ☐ Drill into a component — do results narrow down?
- ☐ Check the **stats cards** at the top — do they show relevant numbers?
- ☐ Try combining hierarchy filter + text search — do they work together?

8. Scan Page (5 tasks)

- ☐ Navigate to /scan — verify the page loads
- ☐ Check if a **barcode scanner interface** appears
- ☐ If there's a manual entry option, try typing a known SKU
- ☐ Check what happens when you scan/enter an invalid barcode
- ☐ Verify scanning a valid barcode navigates to the correct part

9. CSV Import/Export (5 tasks)

- ☐ Navigate to /csv — verify the page loads
- ☐ Check for an **Export** button — click it, verify a CSV file downloads

- ☐ Open the downloaded CSV — verify it contains actual part data (not empty)
- ☐ Check for an **Import** button/area
- ☐ Verify the import interface shows expected format/instructions

10. Admin Panel (8 tasks)

- ☐ Navigate to /admin — verify the page loads
- ☐ Check the **Users** tab — verify all 5 team members are listed
- ☐ Verify **Anson** shows as "admin" and **you** show as "manager"
- ☐ Check the **Role Requests** tab — does it load?
- ☐ Check the **My Barcode** tab — do you see a barcode?
- ☐ Check the **Security** tab — verify the "Change Password" form exists
- ☐ Try changing your password (change it, then change it back to autotraq2026)
- ☐ Verify the **Create User** tab is visible (managers may or may not have access — note what you see)

11. Audit Log (4 tasks)

- ☐ Navigate to /audit — verify the page loads
- ☐ Check if audit entries exist (from your earlier actions)
- ☐ Verify entries show: timestamp, user, action type, details
- ☐ Check if you can filter audit logs

12. Cross-Cutting / UI Quality (10 tasks)

- ☐ Test **every navigation link** in the sidebar/topbar — do they all work?
- ☐ Check for **consistent styling** — same fonts, colors, spacing across all pages
- ☐ Verify **dark theme** is consistent everywhere (no white flashes or unstyled sections)
- ☐ Test the app on a **phone** (or phone-width browser) — list any pages that break
- ☐ Check **loading speeds** — are any pages noticeably slow (>3 seconds)?
- ☐ Verify **error states** — what happens if you go to /parts/99999 (non-existent part)?
- ☐ Check that the **browser URL** updates correctly as you navigate
- ☐ Test the **browser back/forward buttons** throughout the app
- ☐ Look for any **placeholder text** that shouldn't be there ("Lorem ipsum", "TODO", etc.)
- ☐ Check the **favicon** — does the browser tab have an icon?

Total: 103 tasks

When you're done, compile your results and send them to Anson. Note any  items with screenshots if possible.
