Test ID	Description	Pre-Requisites	Test Steps	Inputs	Expected Results	Results	Pass/Fail	Comments	Recommended Changes
ATQ-PDI-001	verify parts count is accurate	Valid Authorized user sign in to AutoTraq, enters Parts Catalog	Tester counts the parts (number per page, multiplied for each full page, then add remainder), and verifies they add to the stated total	N/A	The number of counted parts equals the projected total (534)	20 parts per page, 26 full pages, and 14 parts on 27th page. (20 * 26) + 14 = 534	PASS	See Recommended changes (1)	(1) parts catalog page changing buttons expanded from (prev, next) to (first, 10 before, 1-5 before, current page stated, 1-5 ahead, 10 ahead, last page), in bottom center of page (centered around current page), instead of on bottom right of page
ATQ-PDI-002	Check that all items are named	Valid Authorized user sign in to AutoTraq, enters Parts Catalog	Tester reads each part to verify title follows format	N/A	Each title follows this format: ("PartName- year Make Model Submodel")	Each title followed this format	PASS		(2) all parts return, I'm not sure in what order, regardless of if they meet the search terms.
ATQ-PDI-003	verify that SKUs have consistent formatting	Valid Authorized user sign in to AutoTraq, enters Parts Catalog	Tester reads each SKU to ensure it follows the format	Sample part: SKU: XX-XXX-XX-XXXX Name: Tester Part Description: Test Case - ATQ-PDI-003 Unit Cost: \$8.00	Each SKU follows this format: (Make Code - System Code - Component Code - Random)	Error popup - "SKU already exists"	PASS		(3) parts name editing only allows one character to be added at a time. After each character is entered, the cursor / selection is removed from that box.
ATQ-PDI-004	Verify SKUs are unique	Valid Authorized user sign in to AutoTraq, enters Parts Catalog, then add a New Part	Tester changes "SKU - Auto Generated" to "Enter SKU Manually", then attempt to create a new part, as detailed in "Inputs"	Sample part: SKU: JP-GRA-12-FAFR (Fuel Rail) Name: Tester Part Description: Test Case - ATQ-PDI-004 Unit Cost: \$8.00	Part is rejected for having a duplicate SKU	Error popup - "SKU already exists"	PASS		
ATQ-PDI-005	verify all Part condition values follow enum	Valid Authorized user sign in to AutoTraq, enters Parts Catalog	Tester filters Parts by each condition, and sums the parts in each condition, to verify they match with total (534)	N/A	All parts have a condition within the conditions listed in the Part Condition Grade Guide (new, excellent, good, fair, poor, core, salvage), or are listed as Unknown	For each condition, there were the following number of parts: new (71), excellent (106), good (160), fair (114), poor (39), core (25), salvage (19), unknown (0), which totals to 534	PASS		
ATQ-PDI-006	Verify that listed price for parts is the same on the Catalog Main Page, and the Parts' Individual Parts Detail Page	Valid Authorized user sign in to AutoTraq, enters Parts Catalog	For 5 randomly selected parts, note its price on the main page, then select the detail page to verify	N/A	Each part's price will be equivalent on both of their respective pages	ABS Sensor (FD-E1-04-BRAB) was \$53 on both pages Brake Shoes (CH-SL-10-BRS4) was \$7 on both pages Water Outlet (FD-E3-05-CLWP) was \$53 on both pages Tail Light Assembly (FD-FXX-11-ELTL) was \$53 on both pages Fuel Rail (JP-GRA-12-FAFR) was \$53 on both pages	PASS		
ATQ-PDI-007	Check if any parts have no cost	Valid Authorized user sign in to AutoTraq, enters Parts Catalog	Using the Advanced Search, set price settings to minimum of 0 and maximum of 1 (incase search naturally excludes the exact maximum capacity)	Set advance search terms to: minimum = \$0 and maximum = \$1	No parts should return	All parts return, sorted by something other than price (unsure)	FAIL	See Recommended changes (2)	
ATQ-PDI-008	check if any parts have no description	Valid Authorized user sign in to AutoTraq, enters Parts Catalog	Tester skims every part to view if there is a description present	N/A	Each part should have a description	All Parts have a description	PASS		
ATQ-PDI-009	create a new part in the UI, verify persistence	Valid Authorized user sign in to AutoTraq, enters Parts Catalog	Tester opens the Parts Catalog, creates new part. Part to pretend to be a Chevrolet Equinox's Exhaust Flex Pipe	Sample part: Make: Model: Chevrolet, Equinox Year: 2024 System: Component: Exhaust, Flex Pipe Name: Tester Part Description: Test Case - ATQ-PDI-009 Unit Cost: \$1.00	Test Part should be created	Test Part created with SKU: CH-EQU-24-EXFP	PASS		
ATQ-PDI-010	edit that parts name, verify persistence	Valid Authorized user sign in to AutoTraq, enters Parts Catalog, Tester already ran Test ATQ-PDI-009	Tester opens Test Part, changes Name to "Test Part - Updated", then sign out of page, then sign in and search for part in parts catalog	Name: Test Part - Updated	Test Part - Updated should retain its new name	Test Part Name retained changes	PASS	See Recommended Changes (3)	
ATQ-PDI-011	delete that part, verify it stays gone	Valid Authorized user sign in to AutoTraq, enters Parts Catalog, Tester already executed test ATQ-PDI-010	Tester opens Parts Catalog, selects part "Test Part - Updated", deletes part, signs out, then signs back in to see if part is still deleted	N/A	Test Part - Updated should be gone	Test Part is gone	PASS
